Across the Aisle:
2023 Nationwide Voter & Parent Education Survey Results Summary
Now in its third year, *Across the Aisle* (formerly The Covid Constituency) was developed in partnership with The Honorable Bob Wise (Governor, 2001 – 2005, and U.S. House of Representatives, 1983 – 2001, West Virginia). Across the Aisle seeks to build on the unprecedented political will for educational innovation that emerged in the shadow of the pandemic and connects public needs to policymakers by collecting firsthand experiences, perceptions, and priorities from the public – ultimately translating them into actionable, nonpartisan policies that will fundamentally change education for the better.

As part of this work, The Hunt Institute partners annually with national public opinion and political strategy research firm Lake Research Partners to conduct a nationwide survey of voters and parents to learn about their priorities and concerns in education.

In the following slides, please find summary findings from our 2023 survey. The full survey findings, including further disaggregated data, additional research, information on sample sizes, etc. can be found below.
Quantitative – Online Survey

Lake Research Partners designed and administered a nationwide online survey between July 18-25, 2023. The survey reached a total of 1,300 likely 2024 voters, which includes a base sample of 800 likely voters and oversamples of 100 African American likely voters, 100 Asian American Pacific Islander likely voters, 100 Latino/a likely voters, 100 Native American likely voters, and 100 likely voters who are parents of school-aged children.

Survey respondents were drawn from online panels and screened to be likely 2024 voters. To ensure the sample reflects attributes of the actual population, the base sample of likely voters was weighted slightly by region, gender within region, age, gender within age, race, gender within race, party identification, education, and age within race to reflect attributes of the actual population; the African American sample was weighted slightly by education; the Latino/a sample was weighted slightly by region and education; the Asian American Pacific Islander sample was weighted slightly by region, age, and education; the Native American/Indigenous sample was weighted slightly by gender, region, education, and party identification; and the parent of school-age children sample was weighted slightly by gender, region, gender within region, age, education, race, and party identification. All oversamples were weighted down into the base to reflect their actual proportion of likely 2024 voters nationwide.

Because the sample is based on those who initially self-selected for participation in the panel rather than a probability sample, no estimates of sampling error can be calculated. All sample surveys and polls may be subject to multiple sources of error, including, but not limited to, sampling error, coverage error, and measurement error. If this poll were conducted among a probability sample, then the margin of error would be +/- 2.7 percentage points at the 95 percent confidence interval; the margin of error would be higher among subgroups.

Note: Due to rounding, some numbers in the report will not always add to 100%.

Throughout the report, unless otherwise indicated, “parents” in this report are parents or guardians of a child/children under the age of 22. 2024 battleground voters are defined as those living in the following states: Arizona, Colorado, Connecticut, Georgia, Florida, Iowa, Missouri, Nevada, New Hampshire, North Carolina, Ohio, Pennsylvania, or Wisconsin.
Core Values for Education
Despite growing rhetoric around division in education, our 2023 survey found significant alignment – across race/ethnicity, gender, and political affiliation, around what voters value and want in education. As such, the below proposals should be viewed not merely as “wants,” but rather as “core values” that are shared by education stakeholders nationally.

- Increase job skills and workforce training opportunities in high school, like apprenticeships and internship opportunities* (22% Favor - Strongly, 72% Favor – Not so Strongly)
- Teaching critical skills for the workplace in schools, such as problem-solving, communication, teamwork, and professional etiquette* (21% Favor - Strongly, 68% Favor – Not so Strongly)
- Train educators and other school personnel to identify warning signs and intervention techniques related to mental health* (22% Favor - Strongly, 66% Favor – Not so Strongly)
- Provide all students with education about the risks of being online and how to stay safe (26% Favor - Strongly, 64% Favor – Not so Strongly)
- Implement evidence-based literacy programs in classrooms to improve student reading levels* (24% Favor - Strongly, 62% Favor – Not so Strongly)
- Ensure equitable access to high quality early childhood and pre-K education* (27% Favor - Strongly, 62% Favor – Not so Strongly)
- Train school safety officers to interact in a school environment, including anti-bias training, disability awareness, and cultural awareness training* (27% Favor - Strongly, 61% Favor – Not so Strongly)
- Increasing teacher salaries to be more competitive with industries that require a similar level of education and skillset* (26% Favor - Strongly, 60% Favor – Not so Strongly)
- Invest in strategies and programs to hire more teachers in hard-to-staff subject areas and regions, like rural areas (30% Favor - Strongly, 60% Favor – Not so Strongly)

*Split sampled
Voters view many issues as very important for public officials and education leaders to address – but tend to prefer further investments and supports for educators and students over divisive “hot topics,” such as teaching about gender and sexuality, book bans, and curriculum censorship.

What Do Voters See as the Biggest Problems Facing Education Today?

Voters perceive that teaching real-world skills for the future workforce, ensuring public schools are free of guns and other physical violence, teacher salaries, ensuring students are reading at grade level, and ensuring public schools are free of bullying (including cyberbullying) are very big problems in public education today.

### Top “Very Important” Issues in Education by Demographic

While there tends to be mutual agreement about top education issues across demographic groups, some variations exist. For Black, Latino/a, and AAPI voters; voters across gender and age; and among Independents and Republicans, **hiring quality teachers** rises to the top as the most important issue. White voters and Democrats view **ensuring schools are free of guns and other physical violence** as very important, although **hiring quality teachers** is a close second. Differences between demographic groups further emphasize the need for targeted interventions, supports, and messaging.

#### White
- Ensuring schools are free from violence (81%)
- Hiring quality teachers (79%)

#### Black
- Hiring quality teachers (81%)
- Hiring staff in schools (77%)
- Ensuring schools are free of violence (73%)
- Ensuring students are reading at grade level (73%)

#### Latino/a
- Hiring quality teachers (82%)
- Ensuring schools are free of bullying (72%)
- Ensuring schools are free from violence (70%)

#### AAPI
- Hiring quality teachers (84%)
- Ensuring schools are free from violence (79%)
- Teacher salaries (61%)

#### Native/Indigenous
- Ensuring students are reading at grade level (79%)
- Hiring quality teachers (77%)
- Ensuring schools are free from violence (75%)
- Teaching real-world skills (75%)

#### Men
- Hiring quality teachers (74%)
- Ensuring schools are free of violence (72%)

#### Women
- Hiring quality teachers (84%)
- Ensuring schools are free of violence (84%)
- Providing support for children with disabilities (82%)

#### Democrat
- Ensuring schools are free from violence (83%)
- Hiring quality teachers (79%)

#### Independent/Don’t know
- Hiring quality teachers (78%)
- Ensuring schools are free from violence (77%)
- Ensuring students are reading at grade level (71%)

#### Republican
- Hiring quality teachers (81%)
- Ensuring schools are free from violence (76%)
- Ensuring students are reading at grade level (75%)
- Requiring students to use the bathroom and locker rooms that match their biological sex (67%)

Note: Percentage values indicate the percentage of a demographic who indicated the issue was “very important”.

What Resonates With Voters?

Voters were provided various statements about education today and asked to reflect on whether they agreed with those statements – the top three responses further highlight “core values” among voters nationwide, with over 90 percent of voters in agreement.

- **Schools should teach history and current events accurately so that our students don't have an incomplete understanding compared to other students around the world**

  - Strongly agree: 77%
  - Not so strongly agree: 15%
  - Total: 92%

- **Investing in our children is not a political choice, it is a moral choice, it is the right choice, and it is a smart choice**

  - Strongly agree: 76%
  - Not so strongly agree: 16%
  - Total: 92%

- **Our public-school teachers need resources in the classroom that allow for personalized learning, up-to-date textbooks, and technology**

  - Strongly agree: 73%
  - Not so strongly agree: 18%
  - Total: 91%
The State of Education
How Do Voters View Education Spending?

A plurality of voters nationwide say their state is spending too little on public school funding, down from last year. The Hunt Institute is also one of the few organizations collecting community-level findings. We found that voters are less likely to view their local schools as spending too little, which has remained consistent over time.

While voters are less likely to view their local communities as spending too little on education, the prevailing belief nationally continues to be that schools are underfunded.
### How Do Voters Feel about Various Education Entities?

Very few voters say that any particular entity is doing an excellent job when it comes to education today. Two-thirds believe that teachers and 4-year colleges in their state are doing a good job overall, while a majority of voters believe that elected officials, K-12 public schools nationwide, and school board members are doing just fair/poor. In fact, more than 1 in 5 say that elected officials and school board members are doing a poor job, highlighting that voters remain skeptical of the role of elected officials in public education. These findings further highlight that voters tend to feel more positively about their local schools and education systems vs. K-12 schools generally and statewide.

Students and Support
**What Do Voters Think Would Be Most Helpful for Students?**

Afterschool programs and/or summer learning opportunities top the list of things that voters believe would be helpful to students moving forward, followed by additional counseling or social, emotional, and mental health supports; individualized learning plans; and connecting families to community-based support services. A significant number of voters believe that increasing the length of the school day or year, or adding additional days for instruction would not be helpful. As such, education leaders are likely to see the greatest support for initiatives that allow families to “opt in” or that take place during the traditional school day. These findings have remained consistent over time.

What is the Role of Afterschool Programs?

Interest in afterschool and other out-of-school time programs continues to grow, particularly as states work to recover lost learning time and get students back on track academically. While more 70 percent of voters think these programs are an absolute necessity, a majority of families aren’t participating in afterschool or summer programming.

| Does your child’s school offer additional learning opportunities, such as afterschool tutoring or summer programming? |
|---|---|---|
| Yes | No | Not sure |
| 61% | 32% | 8% |

| Does your child participate in out-of-school educational instruction via afterschool or summer programs? |
|---|---|---|
| Yes | No | Not sure |
| 60% | 39% | 1% |

| Thinking about children and the hours after school and during the summer, would you say that afterschool and summer learning programs are an absolute necessity for your community or not really?* |
|---|---|---|
| Strongly | Not so Strongly | Not sure |
| 72% | 30% | 6% |

*Split sampled
What is the Role of Standardized Testing?

More than 8 in 10 voters nationwide see a role for standardized testing in evaluating students’ proficiency, but only a third say they should play a major factor, possibly opening the door for states to explore alternative methods of evaluating student achievement. Notably, voters and parents of color are more likely to say standardized assessments should be a major factor in evaluating student proficiency.

How much of a factor should standardized test scores be in evaluating students’ proficiency in different subjects?

- **All Parents of Color**: 49% (major factor), 15% (minor factor), 33% (not sure)
- **Black Parents**: 56% (major factor), 15% (minor factor), 29% (not sure)
- **Latino/a Parents**: 55% (major factor), 15% (minor factor), 30% (not sure)
- **Black Voters**: 46% (major factor), 15% (minor factor), 39% (not sure)
- **AAPI Voters**: 48% (major factor), 15% (minor factor), 37% (not sure)

*Split sampled*
How Do Voters Feel About Various Levers for School Choice?

Both vouchers and education savings accounts (ESAs) are popular among voters nationwide, but intense support continues to be limited for both, despite growth in the usage of public funds for private schooling options nationally.

Parental Involvement
How Confident Are Parents in Their Understanding of Their Child(ren)’s Development?

A solid majority of parents across all surveyed demographics are confident in their understanding of how their children are doing both academically and in other aspects of their development, including socially, emotionally, and mentally. More than 7 in 10 Black and Latino/a parents are very confident in their understanding of how their child is doing academically.

How confident are you that you have a clear understanding of how well your child(ren) are doing academically?*

How confident are you that you have a clear understanding of how well your child(ren) are doing in other aspects of their development, like socially, emotionally, and mentally?*

*Split sampled; ^note small sample size
Do Voters Feel Parents are Involved in Education?

More than 8 in 10 voters believe that parents should be included in their child’s education, and about 7 in 10 voters agree that parents are included in their child’s education and what they are taught. In general, voters feel that parents already have a partnership with teachers – and this feeling has increased since last year (by 11 points).
Do Voters Feel Parents are Involved in Education?

More than 8 in 10 voters believe that parents *should* be included in their child’s education, and about 7 in 10 voters agree that parents *are* included in their child’s education and what they are taught. In general, voters feel that parents already have a partnership with teachers already – and this feeling has increased since last year.

Who Should Have Oversight of Curriculum?

Voters see a major role for teachers in determining curriculum, as well as for parents of school-age children—highlighting that despite narratives placing these groups at odds with each other, voters see both groups as necessary for curriculum oversight. Notably, fewer voters say school principals or local school boards should have a lot of oversight in curriculum decisions and largely feel that local and national elected officials should not play a role.
How do Parents want to Engage in Curriculum Oversight?

When presented with a proposal to ensure parents are involved in setting the curriculum around what their children are taught, **76 percent** favored the idea, including **45 percent** who strongly favored. Drilling deeper, The Hunt Institute found that phrasing such as “review and provide feedback” on curriculum drew even stronger responses, with a majority of voters, **54 percent**, favoring such proposals. Fathers of school-age children are especially likely to say they’d be willing to review and provide feedback, with **93 percent** showing agreement.

Education Messaging
Educational Statements That Garner Voter Support

Voters are most likely to support public officials or educational leaders who say, “We must equip every school with the resources necessary to deliver quality education that prepares every child for the future, no matter who they are, what they look like, or where they come from.” Advocating for policies that empower students to be critical thinkers, prioritize mental health resources, support school and child safety, and encourage students, regardless of their skin color or zip code, to follow their dreams are all winning messages with voters.

- We must equip every school with the resources necessary to deliver quality education that prepares every child for the future, no matter who they are, what they look like, or where they come from*
  - Very likely: 19%
  - Somewhat likely: 66%
  - Total: 85%

- While a strong foundation in reading, writing, math, and other core subjects is as important as ever, lifelong success for every student requires more. Students that develop real-world skills, like critical thinking and career training are better prepared for further education, work, and civic life
  - Very likely: 24%
  - Somewhat likely: 63%
  - Total: 87%

- We must equip every school with the resources necessary to deliver quality education that prepares every child for the future, no matter their color, background, or zip code*
  - Very likely: 28%
  - Somewhat likely: 62%
  - Total: 90%

- Our schools cannot be a safe place for our children when we don’t address gun violence and other physical violence. We need schools to be free of guns and we need to make sure teachers and staff are trained to identify warning signs and intervention techniques*
  - Very likely: 21%
  - Somewhat likely: 62%
  - Total: 83%

- Real learning cannot happen when students start the day hungry or are stressed about problems at home; so let’s make sure those who need it have healthy meals and mental health support from trusted counselors
  - Very likely: 23%
  - Somewhat likely: 61%
  - Total: 84%

- Our public-school teachers need resources in the classroom that allow for personalized learning, up-to-date textbooks, technology, and resources in the classroom that help students’ learning, as well as supportive administrators and opportunities for professional development
  - Very likely: 25%
  - Somewhat likely: 60%
  - Total: 85%
